Due to the ever-growing volume of new legislation, real estate projects must always pay special attention to the legal aspects.

Broad experience and expertise in the real estate sector

Our Real Estate team enjoys extensive experience and competence in the various real estate sectors: urban planning, PPPs, leases, construction contracts, corporate structuring and real estate finance.

At the pre-contractual level, we are recognised for our ability to structure operations, perform due diligence and provide effective guidance during the development of town planning projects. Our teams also enjoy a strong reputation thanks to their experience in negotiating and drafting all types of contract documentation. We offer a vast range of services, notably in real estate law, administrative law, corporate law and tax law.

We operate in the housing sector and in office and retail developments. We have also developed expertise in infrastructure for private investors, real estate developers, contractors and other construction stakeholders, as well as for public authorities.

We strive to provide a service of excellence combined with a keen awareness of the practical constraints, all in full compliance with client's strategy and expectations.
